MailFinisher4000N with
Cabinets & HP4515N

MailFinisher4000N with HP4350N

The MailFinisher 4000 system is a small to medium volume In-Line System which is interfaced with a compatible laser printer, whereby the printer feeds the MF4000 directly and the forms are printed, folded and sealed in one single operation, therefore, speeding up the processing and also making it easier for the operator.

The MF4000N is provided with a static base and a 200 forms integral output catch tray. The system requires a full desktop space to locate the machine and laser printer.

Optional cabinets are available which will provide a suitable surface for the whole system and also storage beneath.

The system is compatible with the following printers which provide up to 500 sheet in-feed capacity (based on 80gsm paper).

HP LJ4200N	HP LJ4515N
HP LJ4250N	HP LJ4015N
HP LJ4300N	HP LJ4014N
HP LJ4350N	Kyocera FS4000DTN**

** The Kyocera option is the only laser printer that can produce 'in-line' WITH Duplex, therefore all folds are available with this printer.

*** 'Print Only Mode' is not required if using the Kyocera FS4000DTN.

Other laser printer models are also compatible with the MF4000 including OKI, Lexmark, Samsung, Kyocera and other HP models. Please check with us for suitability.

Please note the following:

* *The laser printer is not unique to this machine; it can still be used as a normal office laser, either by separating the laser printer from the MF4000 or by using the optional 'Print Only Mode'.*

Print Only Mode enables the system to be used as a standard laser printer without the need to separate the laser from the MF4000.***

* *Please note that 14" Z fold forms are compatible using an optional replacement drum that is dedicated to 14" Z and A4 Z folds only.*

* *The processing speed of the system is regulated by the page per minute speed of the printer.*

* *All prices above exclude laser printer, although we are able to supply quotation if required.*
